

**SOW-5: DATA AVAILABILITY / NEEDS ASSESSMENT**

- 5.1 *Contractor* shall determine the availability of test data and information for registering each substance listed by the *Buyer*, as required by *the REACH regulation*.
- 5.2 Except as specified elsewhere, *Contractor* need not, as part of this SOW, physically obtain copies of the data and information needed.
- 5.3 *Contractor* shall make the determinations on the basis of the *REACH Guidance* document titled: *Guidance on Information Requirements and Chemical Safety Assessment, Chapter R.3: Information Gathering*.
- 5.4 *Contractor* shall communicate and work directly with all *SIEF* members to obtain the information required under this SOW.
- 5.5 *Contractor* shall prepare a table / matrix for the *Buyer* that details the following:
  - The test data required by Annexes VII through [X] for each tonnage band
  - The availability of test data to satisfy each required data element
  - The source(s) / owner(s) of the available data
  - An initial or provisional reliability rating of available data
  - The fair market value of the available data
  - Any charges / terms specified by the owner for using the data
